COMPANY PROFILE

Philosophy

Flashlight was created during the darkest time for our generation, the pandemic hits, people lose their dreams, and lose their hope, lose their drive, creativity. It is dark all around.

"The name flash light was inspired by flashlight, the idea that our company could be the guiding illumination and helper in your navigation through the complicated world of lighting."

Who are we?

We are a Bali based company in Indonesia. We specialized in **decorative lighting**, our team is built with the freshest minds in the industry. We do designs, manufacturing, and consulting for all kinds of lighting needs.

We enriched ourselves with the knowledge and philosophy of lighting itself. For us design is much more than just beauty, but **something that comes from story** together with the characteristic of lighting itself.

Chandelier

We can manufacture many different style of decorative lamps, all shapes and sizes.

Our star products are definitely natural material/rustic material style lamps as we are based in Bali, here we work with many local suppliers and craftsman who has been perfecting their crafts for years, some even generationally.

"We help by providing supervision in their local workshop and help them increase their output quality so their work can be taken internationally"

Floor Lamps

"Decorative lighting requires more soul, it requires passion to be created, some are even handmade, they are far more **bespoke**, there's a way to deal with something this **individually unique**"

Our Supplier

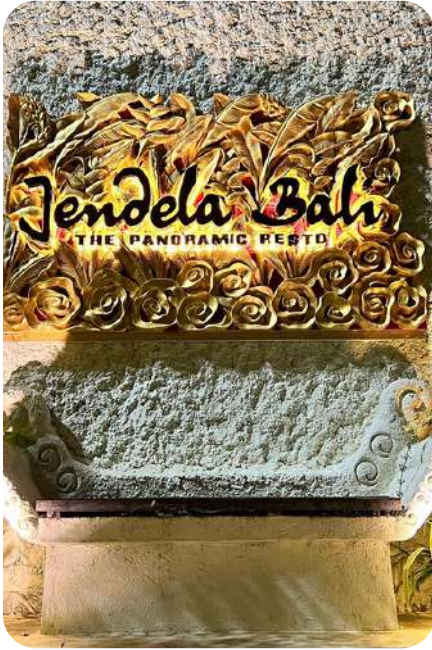

"we work with **world class, trusted, supplier** from all over the world, we choose the most ethical and the best fabrication center to source all of our materials and lamps"
